

When academics and practitioners collaborate on research, what key elements help make the collaboration successful?

What needs to be done to strengthen the connection between research and practice?

Employ an Embedded Research Fellow

Acts as a Knowledge Broker who facilitates the creation, sharing, and use of knowledge

5 practices of successful knowledge brokering:

1. Understanding the political, social & economic context
2. Build trust among partners
3. Develop capacity for K*
4. Enable knowledge to be co-constructed
5. Build a culture of K* for all participants

Knowledge Brokering Source:
